

Cosmopolis: A Novel

It is an April day in the year 2000 and an era is about to end -- those booming times of market optimism when the culture boiled with money and corporations seemed more vital and influential than governments. Eric Packer, a billionaire asset manager at age 28, emerges from his penthouse triplex and settles into his lavishly customized white stretch limousine. On this day he is a man with two missions: to pursue a cataclysmic bet against the yen and to get a haircut across town. His journey to the barbershop is a contemporary odyssey, funny and fast-moving. Stalled in traffic by a presidential motorcade, a music idols funeral and a violent political demonstration, Eric receives a string of visitors -- his experts on security, technology, currency, finance and theory. Sometimes he leaves the car for sexual encounters and sometimes he doesn't have to. *Cosmopolis*, Don DeLillo's thirteenth novel, is both intimate and global, a vivid and moving account of a spectacular downfall.
