

## New Generation Internet Connection

A steady growth of the global Internet requires to evolve its architecture to adapt to new technologies to support the growing number of users, applications, and received e uslugi.IPv6 designed to meet these requirements and enable a return to global end- to-end environment where adresirachkite rules will again be transparent to applications.The existing IP address space is not able to meet the potential large increase in the number of users and the geographical area covered by the Internet...
