

Social Work Practice Placements: Critical and Reflective Approaches (Transforming Social Work Practice Series)

All social work students must undertake Practice Placements in the second and final years of their programme and the placement is a crucial area of assessment for passing the degree course. This book will help to develop students' critical thinking, analytic and reflective skills as they progress through their two placements. It will help them build a successful practice portfolio and understand exactly how they fit into the myriad of other professionals and services that make up day to day reality of practice. Crucially, this book will also feature a chapter on developing these skills into the workplace. Uniquely, it argues that becoming a competent and thriving social worker is dependent on success in the placement.
